

ORGANIZATION OF SCIENTIFIC, CREATIVE, VOLUNTEER WORK OF CADETS IN MARTIAL LAW

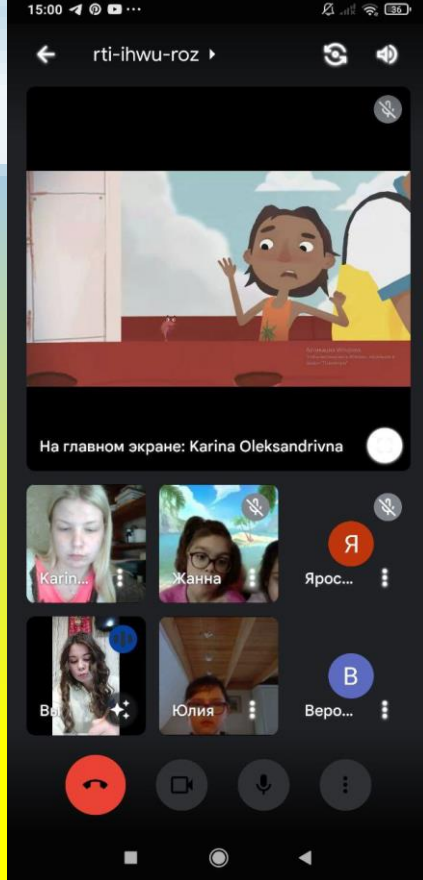

Vitalii Naida

These features of the organization of scientific, creative, volunteer work of cadets are taken into account in the activities of the School of Scientific Leadership of the Kharkiv National University of Internal Affairs

1. Participation of cadets in volunteering, namely assistance in removing civilians from areas of active hostilities, purchasing food, medicine, hygiene products and household items for less mobile and most vulnerable groups, making camouflage nets from obsolete clothing and their subsequent transfer to the Armed Forces of Ukraine.

ЧАСТИНА КОШТІВ БУДЕ ПЕРЕВЕДЕНА НА ГУМАНІТАРНУ ДОПОМОГУ

2. Implementation by local university students of local social projects to help the population, in particular children. Such activities also require applicants to have knowledge of project management, constant communication and interaction with public and international organizations, psychologists, teachers and parents of children.

3. Preparation of creative works - essays, poems, posters. This area of work is aimed at creative understanding of the difficult living conditions of the population during martial law, the exploits of servicemen and police, the activities of the resistance movement, the evacuation process and more.

4. Scientific activity of cadets, aimed at the implementation of practical experience of service in martial law, which is currently acquired by cadets in the territorial police units, in their own research. At the same time, on the example of the School of Scientific Leadership, it is important that students determine the current problem of practical activities that they regularly encounter during their service.

5. Conducting regular meetings of scientific circles, schools, educational subdivisions with cadets or students on topical issues of science, creativity and volunteering.

7. Monitoring of international and national educational platforms, sites and channels in messengers and social networks in order to find relevant opportunities for non-formal education: online projects and training courses, essay contests, videos, posters, research papers.

8. Coordination of the international direction of work of cadets during martial law, development of relevant international projects, mainly online, representation of Ukraine at the international level, dissemination of campaigns among the international youth community in support of Ukraine.

Alarm rang out in the sky
In the basement under the missiles noise
Baby's mother crumbs from biscuits
Collects from the floor.
Over there under the "Grad" fire
An ambulance rushes to the city,
Shells fly into house,
Hand shakes nervously.
And we still do not give up:
At the front and in every soul,
We laugh through tears and sorrow,
Truth is our engine!
We are faithful to honor and law,
All our people are behind us!
Our police shoulder straps
Protect humanity freedoms!
We are on guard, we cannot be broken:
No bullets, no «Grad», nothing!
Our job is to defend the people
Without any "no" and "if"!
